SUMMARY

Final-year Computer Science undergraduate skilled in Full-Stack Web Development using React.js, Node.js, Express.js, JavaScript, and MySQL. Strong foundation in Data Structures Algorithms with hands-on experience building web applications and RESTful APIs. Passionate about developing clean, scalable software using Git and GitHub.

EDUCATION

JNTUA College of Engineering

Bachelor of Technology in Computer Science — CGPA: 8.86

Ananthapur

2023 – 2027 (*Expected*)

Sri Chaitanya Junior College

INTERMEDIATE ,MPC— Percentage: 97.9

Tirupati

2021 – 2023

TECHNICAL SKILLS

Programming Languages : C, C++, Java, JavaScript, Python, SQL, PHP

Core Concepts : Data Structures And Algorithms, OOP, DBMS, Operating Systems

Frontend : React.js, HTML5, CSS3, Bootstrap

Backend : Node.js, Express.js, REST APIs

Database : MySQL, MongoDB

Developer Tools : Git, GitHub, VS Code, Postman, XAMPP

PROJECTS

StudentsConnect – Campus Skill Marketplace | Live Demo

- Developed a full-stack campus skill marketplace using React.js, TypeScript, Node.js, Express.js, MongoDB, and JWT, enabling students to post tasks, apply for work, collaborate, and manage orders within their campus.
- Implemented RESTful APIs, JWT-based authentication, role-based access control, and MongoDB integration to provide secure user management, job posting, order tracking, and real-time messaging.
- Built a college-based isolation system with automated order lifecycle management, payment confirmation, and scheduled cleanup, ensuring secure and efficient collaboration across the platform.

INTERCONNECT | Live Demo

- Built a full-stack internship and placement platform using React.js, TypeScript, Supabase, and PostgreSQL
- Built authentication, job matching, application tracking, interview scheduling, and analytics modules.

Library Seat Management System | Live Demo

- Developed a web-based library seat booking system for the District Library, Anantapur
- Implemented real-time booking, slot scheduling, and conflict detection for 100 library seats.

EXPERIENCE

Project Intern-Automation of Formal Verification Workflow

May 2026 – July 2026(Ongoing)

Aeronautical Development Establishment (ADE), DRDO

Bengaluru

- Developed a CI/CD-based formal verification workflow using Python, GitLab, and Polyspace to automate static code analysis.
- Automated pipeline execution, verification report generation, and validation, reducing manual effort and improving verification efficiency.

Data Analysis Intern

May 2025 – July 2025

Andhra Pradesh State Skill Development Corporation (APSSDC)

Remote

- Analyzed smartphone battery performance to identify key factors affecting real-world usage
- Conducted data cleaning, EDA, and visualization to uncover meaningful patterns
- Derived insights to support data-driven design and consumer decisions

ACHIEVEMENTS

- Solved 500+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks.
- Completed the LeetCode Coding Challenges.
